Computer note-taking from patients, 191, (87/21)
Copyright, clear exposition, USA, 118, (37/21)
Crop disease identification, infra-red colour for, 246, (109/21)

Densitometer, exposure meter as, in radiography, 246, (118/21)
Dental camera, 246, (103/21)
cinematography, ultramagnification, 116, (15/21)
Development, low-contrast, of electron micrographs, 188, (51/21)

Educational television, NECCTA conference on research, 245, (98/21)

Ektachrome EF, 'flashing', 190, (65/21)
infra-red transparencies, photo-interpretation techniques, 246, (110/21)
Electron micrographs, low-contrast development, 188, (51/21)
microscope, introduction, 116, (8/21)
scanning, characteristics and applications, part I, 116, (1/21)
microscopy, methods and applications, 246, (113/21)
Electronic video recording (EVR), 189, (55, 59, 60/21)
Electrophotography, preparation, properties and application, 191, (82b/21)
Emulsions, photography, storage capacity, 188, (45/21)
Endoscopes, T/numbers, 188, (48/21)
Exhibition design, 191, (88/21)
Exposure meter, recording from the camera viewing screen, 190, (75/21)
use as densitometer in radiography, 246, (118/21)
Eye, arthropod, internal structures, use of reflected light microscope for observation, 116, (5/21)

Ferpics – ferroelectric ceramic picture devices, 190, (80/21)
Fibre optics photography, 188, (42/21)
Flash photomicrography, 0·2 msec Xenon strobe lamp for, 246, (107/21)
'Flashing' Ektachrome EF, 190, (65/21)
Flicker principle for improving detection of chest lesions, 189, (52/21)
Fluorescent photography in diagnosis and treatment of diabetic retinopathy, 116, (12/21)
Foot-lambert, explanation, 190, (68/21)
Fungi, unstained, photomicrography using infra-red film, 116, (3/21)

Glass, photochromic, shades of data display, 191, (84/21)

Holography, applications, 191, (81/21)
biomedical applications, 245, (93/21)
general theory, 191, (83/21)
simple flash, 117, (18/21)
for study of microcirculation of the blood, 245, (94/21)
visual displays, medical applications, 117, (29/21)

Identification system, university students, colour photography, 190, (72/21)
Illuminating device for measuring microscopes, 116, (7/21)
Illustrations in psychiatry, history, 190, (66/21)
Image fading, latent, influence in quantitative autoradiography, 116, (16/21)
formation and formulae, 246, (114/21)
microline, formation, 188, (46/21)
photographic, signal-to-noise ratio, 191, (82a/21)
Information, search, 117, (20/21)
Infra-red colour for crop disease identification, 246, (109/21)
film, used in photomicrography of unstained fungi, 116, (3/21)
Insect control for photographers, 117, (25/21)
Institute of Medical and Biological Illustration, Annual Conference, 191, (89/21)
Instruction, self, audio-tape for, 117, (30/21)
use of self-learning materials in medical education, 118, (33/21)

Kodak AR.10 stripping film, results obtained in autoradiography, 190, (78/21)

Lecture theatres, difficulties and successes in design, 189, (58/21)
Lenses, teleconverter, in clinical photography, 190, (76/21)
Light sources, for measuring microscopes, 116, (7/21)
Lighting, control equipment, modern techniques, 246, (104/21)
interiors, slide-model technique, 246, (111/21)
Linear blurring, reduction in tomography, 246, (119/21)
Luminence, explanation of foot-lambert, 190, (68/21)

Medical education, clinical pathological conference, 118, (32/21)
self-learning materials, 118, (33/21)
Illustration Department, Sydney, 190, (73/21)
photography, associateship in, 246, (116/21)
Medicine, postgraduate, tape-slide teaching, 118, (36/21)
teaching, audiovisual methods, evaluation, 118, (40/21)
Microline images, formation, 188, (46/21)
Microphotography, *see* Photomicrography
Microscope, operating, cinematography of microsurgical procedures through, 116, (13/21)
reflected light, for the direct observation of interior structures of arthropod eye, 116, (5/21)
Microscopy, coherent-light, overcoming problems, 188, (50/21)
fluorescence, observing growth of pollen tubes in pistil, and ovarian tissue, 116, (6/21)
Microsurgical procedures, cinematography through operating microscope, 116, (13/21)
Multiple sidosis, 245, (91/21)

NECCTA conference on research into educational television, 245, (98/21)

Ocular thermography, 191, (85/21)
Operating microscopes, Zeiss, assistants viewing tube and cine (TV) adapter, 117, (24/21)
Ophthalmology, contributions to medical photography, 246, (117/21)
Optical media and phenomena, 188, (47/21)
Optics, fibre, photography, 188, (42/21)
focus on, 188, (49/21)
in microphotography, 116, (4/21)
Orthodontics, close-range photogrammetry in, 117, (17/21)
Ovarian tissue, fluorescence microscopy, 116, (6/21)

Panacolor multi-row projection system, description, 189, (56/21)
Patients, photography of, 116, (9/21)
Photochromic glass, shades of data display, 191, (84/21)
Photogrammetric instruments, Zeiss, new, 117, (26/21)
Photogrammetry, close-range, in orthodontics, 117, (17/21)
Photographic sound recording, 245, (90/21)
Photographs, prizewinning, from Biocommunications 70, 116, (11/21)
Photography of patients, general survey, 116, (9/21)
unconventional, 190, (79/21)

Photo-instrumentation, 190, (69/21)
Photo-interpretation techniques for Ektachrome infra-red transparencies, 246, (110/21)
Photomicrography, optics in, 116, (4/21)
reversal colour film fidelity in, 116, (2/21)
of unstained fungi using unstained infra-red film, 116, (3/21)
Physiologists view physiological teaching, 118, (34/21)
Physiology, reviews of status and future of teaching films and television, 116, (14/21)
Pollen tubes in pistil, fluorescence microscopy, 116, (6/21)
Preservation of motion picture colour films, 189, (64/21)
Print washing unit, improved, 117, (23/21)
Processing, automatic, economizing in essential services, 188, (41/21)
Programmed instruction for community medicine and public health: selective review of utilization data, 245, (100/21)
learning, Panacolor multi-row projection system, 189, (56/21)
Projection cartridge, description, 246, (106/21)
system, Bolex multimatic, 246, (108/21)
Psychiatry, illustrations in, history, 190, (66/21)
Pupil, psychoreflex, investigations using a cinematographic recording method, 117, (21/21)

Radioautography, electron microscopic, identification of origin of synaptic terminals in normal nervous tissue, 245, (92/21)
Radiography, magnification, visualization of small blood vessels, and determination of focal spot size, 189, (53/21)
Retinal cine-angiography, 117, (19/21)
Retinopathy, diabetic, fluorescent photography in diagnosis and treatment, 116, (12/21)
Room, for television seminar, design, 117, (27/21)

Scanning-beam exposure, X-ray prints by, 189, (54/21)
Self-instructional film cartridges in medical education, 189, (61/21)
Sidosis, multiple, 245, (91/21)
Signal-to-noise ratio of photographic images, 190, (82a/21)
Slide-model technique, for study and evaluation of the luminous environment of interiors, 246, (111/21)
Slide, multiple image, in education, 189, (57/21)
Slides, calibrated, printing from EM negatives, 246, (112/21)
Societies, professional, communication activities, 118, (35/21)
Sound recording, photographic, 245, (90/21)
synchronized, in television displays, audio-visual equipment in, 189, (62/21)
Stripping film, Kodak AR.10, results in autoradiography, 190, (78/21)
Students, identification system, colour photography, 190, (72/21)
Subtraction technique, improved contrast, 117, (28/21)
Super-8 film and equipment, need for standardization, 189, (63/21)

Tape slide teaching in postgraduate medicine, 118, (36/21)
Television, clinical, mobile and colour, 245, (99/21)
display, survey of development, 190, (77/21)
Roentgen image subtraction using one camera, 245, (102/21)
seminar room, design, 117, (27/21)
3-D, demonstration, 245, (101/21)
use of pictures from, 246, (115/21)
use in teaching anatomy, 118, (39/21)
Thermography, ocular, 191, (85/21)
Three-dimensional photographic process, development, 191, (86/21)
Tomography, reduction in linear blurring, 246, (119/21)
Transparencies, Ektachrome infra-red, photo-interpretation techniques, 246, (110/21)

Ultramagnification in dental cinematography, 116, (15/21)
USA and Canada, audio-visual communications, medical and biological, 190, (70/21)

Video cassettes, extensive survey, 246, (105/21)
recording, electronic, 189, (55, 59, 60/21)
tapes in teaching cardiology, 118, (38/21)
Vocal chord vibrations, comparisons, film research with results of electrical measuring techniques, 117, (22/21)

Washing unit, photographic print, improved, 117, (23/21)

Xenon strobe lamp, 0·2 msec, for flash microphotography, 246, (107/21)
Xeroradiography, clinical and experimental applications, 245, (95/21)
X-ray prints by scanning beam exposure, 189, (54/21)
subtraction technique, 245, (102/21)

Zeiss Tessovar, universal photomacrographic zoom system, 116, (10/21)
Zoom system, photomacrographic, universal, Zeiss Tessovar, 116, (10/21)

medical and biological illustration

The Journal of the Institute of Medical and Biological Illustration

Volume 21

Editor-in-Chief	T. A. Quilliam
Art Editor	Sylvia Treadgold
Press Committee	R. Ollerenshaw (Book Reviews), R. Fletcher (Journal Abstracts), R. Marshall (Equipment and Methods)
Advisory Board	L. H. Beard, L. Bowcock, B. S. Bracegirdle, P. N. Cardew, P. Cull, C. E. Engel, M. Essex-Lopresti, I. C. Gilliland, D. Hammersley, P. Hansell, N. K. Harrison, R. C. MacKeith, J. K. Russell, D. Tredinnick
	Editor, *British Medical Journal*
Overseas Corresponding Members	W. F. Berg (Switzerland), R. Gilder (Canada), Charlotte Holt (USA), Nancy Joy (Canada)

British Medical Association Tavistock Square London WC1

No 1 January 1971

page 2 Perspectives and prospectives in studies of the Pacinian corpuscle *P. F. Millington and T. A. Quilliam*

5 The pastel pencil technique for tape-slide illustrations *Sylvia Barker*

10 Adapting varied visual illustrations for optimum teaching and learning *Francis M. Dwyer*

14 Preparation of audio tapes for self-instruction *C. E. Engel*

19 Two tape-slide machines suitable for medical education *Rosalind A. Craddock*

23 Practical instruction on a medical computer by tape and slides *Arnold W. Warltier and Michael Essex-Lopresti*

25 Some observations on multiple choice questions used in conjunction with self-instructional materials *R. E. Wakeford*

27 Forty years of medical art. A biography of Dorothy Davison *Jean Perry*

33 Closed-circuit television in ophthalmology *Peter Hansell, Alan Lane, and Roger Fletcher*

37 Editing video-tape recordings – Part 1 *Alan W. Lane*

42 Biological photography in a college of education *Brian Bracegirdle*

45 The moment of death. An historical commentary *L. M. Payne*

52 The use of colour filters by students with congenital colour defects in the learning of histology *I. A. Olson*

54 Book reviews

56 Reports and proceedings

59 Motion pictures and other media

No 2 April 1971

page 60 Some standard photographic procedures suitable for archaeological documentation *V. M. Conlon*

66 Road accident rescue techniques *R. Snook*

73 Remote photography of cardiac surgery via a membrane mirror *K. P. Duguid*

75 A stereophotogrammetric method of investigating facial changes following the loss of teeth *A. R. MacGregor, I. Newton, and R. S. Gilder*

83 Cine-microangiography *Sven Bellman, Ejnar Eriksson, Howard A. Frank, Argo Kovamees, Peter Lambert, and Bo Oden*

88 An introduction to the study of the skin using the stereoscan microscope *P. F. Millington*

92 Communications in medicine: An expanded educational role for the medical artist *Frank Wray McKee*

95 Medical illustration: The changing scene *George Lynch*

98 Is change the price of progress? *T. A. Quilliam*

100 Cyril Barnett: Research worker and teacher in Anatomy *A. J. Palfrey*

Equipment and methods

109 Inexpensive equipment for fluorescein angiography *Albert Kolstad*

110 Some modifications of traditional modelling techniques for use in teaching anatomy *W. Hewitt*

112 ICEM daylight loop film projector

113 Thermography

114 'Plus Epidiascope'

114 'Medichrome' blue-coloured *x*-ray film

114 Synchronized sound film system

114 Microfilm aid for Mexican physicians

115 Motion pictures and other media

116 Journal abstracts

119 Book reviews

123 Reports and proceedings

No 3 July 1971

page 126 Have desmosomes a role in modulating nervous activity? Some structural considerations *D. L. Tamarind and J. P. Quilliam*

130 Direct recording of stereoscopic images with the scanning electron microscope by the anaglyph colour technique *A. Boyde*

134 Standard views in oral photographic practice *George W. Rogers*

142 A simple camera rostrum *Ronald K. McRae*

146 Perspective drawing *Yvonne P. Banks*

151 Some early illustrations from an exhibition on 'Landmarks in Gastroenterology' *L. M. Payne*

156 Prototype closed-circuit television and audio-visual systems installed at the new Medical School, Nottingham *I. A. Olson*

163 Editing video-tape recordings – Part 2 *Alan W. Lane*

166 Some uses of video-tape recording in language rehabilitation after brain damage *Frances M. Hatfield*

172 First applications of a new laryngograph *A. J. Fourcin and Evelyn Abberton*

183 Cutaneous sensation reconsidered *T. A. Quilliam*

188 Journal abstracts

192 Book reviews

194 Reports and proceedings

200 Motion pictures and other media

No 4 October 1971

page 202 A photo-descriptive study of Sydenham's chorea *A. D. Malcolm and M. Howell-Jones*

206 An illuminated and coloured scale model of the human spinal cord *R. S. Tulsi and P. D. Kempster*

211 Photographic trauma *E. Eriksson, P. E. Barkman, A. Fraser, M. H:son Holmdahl, S. Månsson, and B. Nilsson*

215 The Zeiss Tessovar and photography in the macro range *B. Bracegirdle*

223 The electromagnetic spectrum, the eye, and vision *T. A. Quilliam*

229 Waterloo and after: some medical vignettes *L. M. Payne*

232 An introduction to microphones *Ronnie Morgan*

239 Video tape to film transfer: an aid to the construction of a graphic teaching programme *P. E. James and G. W. H. Leytham*

Equipment and methods

243 Photographic copying arrangement *Arthur Smialowski and Donald J. Currie*

245 Journal abstracts

247 Book reviews

250 Reports and proceedings

253 Motion pictures and other media

255 Index to volume 21
